DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 4-6, 8-10, 13-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergsbaken et al in view of Ruben. The patent to Bergsbaken et al teaches structure substantially as claimed including a cover(10), made of a non woven material (columns 3, lines 63-67, column 4, lines 10-13), folds and side drops, connection structure including adhesives, bonding (column 4, lines 46-55) the only difference being that the connection structure is a separate piece of material. However, the patent to Ruben teaches the use of providing a folded cover with attaching structure as a unitary one piece member. It would have been obvious at the time of the invention to modify the structure of Bergsbaken et al to include a cover of a unitary construction, as taught by Ruben since such structures are conventional alternative structures used

in the same intended purpose, thereby providing structure as claimed. The methods would have been obvious in view of the structures. It is noted that Bergsbaken et al teaches the use of permanent joining through conventional structures including taping, sewing, gluing, heat seaming, ultra-sonic bonding.

Response to Arguments

Applicant's arguments filed 08-14-07 have been fully considered but they are not persuasive.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
